

Large Projects

Food Industries

| | |
|--|--|
| Project Name: | Edible Oils Extraction & Refining Factory |
| Project Purpose: | Production of refined edible oils to cover the big gap of the imported goods. |
| Target Markets: | Local and external markets |
| The Proposed Production Capacity as an Example: | <ul style="list-style-type: none"> • Soya oil : 20,000 tons • Sunflower oil : 55,000 tons • Soya & sunflower fodder: 55,000 tons • Fatty acids: 3,000 tons |
| Required Area : | 15,000 m ² |
| Approximate Investment Cost: | US \$50 Million |
| Power Sources: | Annual consumption of electricity: 1,850 MWH Annual consumption of water: 2,000 m ³ Annual consumption of gas : 7 Million m ³ |

Pharmaceutical Industries

| | |
|--|--|
| Project Name: | Intravenous Blood Solutions and Medical Devices |
| Project Purpose: | Production of remunerative blood solutions - water for injection – purified water - infusion sets- blood transfusion set. |
| Target Markets: | Local and external markets |
| The Proposed Production Capacity as an Example: | <ul style="list-style-type: none"> • Intravenous solutions: 20 Million bag of 500 ml • Water for injection: 25 Million plastic ampoules • Purified water for medicines: 20 Million bag • Infusion set: 4 Million set • Blood transfusion set: 4 Million set |
| Required Area : | 15,000 m ² |
| Approximate Investment Cost: | US \$80 Million |
| Power Sources: | Annual consumption of electricity: 4700 MWH Annual consumption of water: 12,000 m ³ |

Textile Industries

| | |
|--|--|
| Project Name: | 100% Cotton Yarn (Medium – Thick) |
| Project Purpose: | <ul style="list-style-type: none"> • Production of 100% cotton yarn (medium – thick) to fulfill the needs of both local & export market. • Used in the production of different types of fabrics in ready-made garments industry. |
| Target Markets: | Local and external markets |
| The Proposed Production Capacity as an Example: | 33,000 tons /year |
| Required Area : | 320,000 m ² |
| Approximate Investment Cost: | US \$70 Million |
| Power Sources: | Annual consumption of electricity: 91 MWH Annual consumption of water: 24,000 m ³ |

Textile Industries

| | |
|--|---|
| Project Name: | Fabrics & Blankets from Synthetic Fibers |
| Project Purpose: | Production of: <ul style="list-style-type: none"> • Yarn & fiber of 100% synthetic fibers with different diameters. • Circular & rectangular fabrics (dyed, printed & finished). • Blankets from synthetic fibers. |
| Target Markets: | Local and external markets |
| The Proposed Production Capacity as an Example: | 10 Million tons /year |
| Required Area : | 250,000 m ² |
| Approximate Investment Cost: | US \$80 Million |
| Power Sources: | Annual consumption of electricity: 80 MWH Annual consumption of water: 700,000 m ³ Annual consumption of gas: 10500 Million m ³ |
