the 1990s, the number of people who are employed in the service sector has increased in all countries, but the increase has been particularly large in the United States.

There are several reasons for the increase in the service sector. First, the demand for services has increased. Second, the productivity of services has increased. Third, the demand for services has increased faster than the demand for goods. Fourth, the productivity of services has increased faster than the productivity of goods.

The increase in the service sector has led to a decrease in the number of people who are employed in the manufacturing sector.

There are several reasons for the decrease in the manufacturing sector. First, the demand for goods has decreased. Second, the productivity of goods has increased.

The decrease in the manufacturing sector has led to a decrease in the number of people who are employed in the manufacturing sector.
